SUMMARY

Computer Engineering graduate with hands-on experience in full-stack web development, RESTful API design, and system integration. Proficient in **PHP (Laravel)**, **Go**, **MySQL/PostgreSQL**, and **Docker**, with a proven track record of building enterprise modules, automated ticketing systems, and microservice architectures. Strong background in database design, system monitoring, and optimizing web application performance.

WORKING EXPERIENCE

Nore Inovasi, Semarang

August – Dec 2025

[INTERN] Full Stack Web Developer

- Built full-stack CRUD applications featuring file upload capabilities, user authentication, and Excel/PDF data export using Laravel and jQuery.
- Developed internal ticketing modules for leave management, attendance, and multi-tier approval workflows, integrated with automated WhatsApp and Discord notifications.
- Engineered financial modules (general journal, Chart of Accounts, payroll) and project statistics dashboards to support executive monitoring and management decision-making.

IKITAS, Semarang

Apr - Nov 2020

[INTERN] Graphic Designer & Web Developer

- Developed company profile websites using WordPress.
- Designed visual marketing and educational assets, including flyers, Instagram feed content, video bumpers, and educational banners.

EDUCATION

Polytechnic State of Semarang, Semarang

Sept 2022 – Sept 2026

Bachelor of Applied Science (D4) in Computer Engineering Technology

GPA 3.82 of 4.00

SMKN 7 Semarang, Semarang

May 2018 - May 2022

Vocational High School Diploma in Network Information Systems and Applications

Final Score 86.93 of 100.00

ORGANIZATION ACTIVITIES

Polytechnic Computer Club Polines (PCC), Semarang

Staff Divisi Workshop

May 2024 - May 2025

- Organized internal and campus-wide workshops across three technical domains: Multimedia, Software Engineering, and Networking.
- Evaluated member skill sets and assigned delegates to represent the organization in IT competitions based on their talents.
- Curated the Networking Department curriculum to enhance member technical competency and competition readiness.
- Served as Person in Charge (PIC) for the Cyber CTF Jeopardy Competition at TECHCOMFEST 2025, managing participant/judge coordination and server infrastructure setup.

Staff Departemen Network

May 2023 - May 2024

- Instructed two internal workshops covering "Local DNS & Web Server Configuration in Linux" and "Docker Fundamentals".
- Enhanced member technical skills in networking through structured internal training sessions.

- Provided technical network support and infrastructure setup for all organization events.

CERTIFICATIONS

Database Programming with SQL — Oracle Academy	Jul 2023
Database Design — Oracle Academy	May 2023
CCNA: Switching, Routing & Wireless Essentials — Cisco Networking Academy	Jul 2021
MTCNA (MikroTik Certified Network Associate)	Feb 2026
Big Data Analyst Associate — SOLUSI247	Aug 2025
Ethical Hacker — Cisco Networking Academy (Universitas Indonesia)	Jun 2024
IT Essentials: PC Hardware and Software — Cisco Networking Academy	Sep 2019
TEPPS (English Proficiency Test)	Apr 2026
Score: 760 / 990	

TECHNICAL SKILLS

- Proficient: Go (Golang), PHP (Laravel), MySQL, PostgreSQL, Docker, Linux, Git.
- Familiar / Exposure: Node.js (NestJS), Python, React.js, Flutter, Redis, Playwright, Podman, Ansible, Terraform, Prometheus, Grafana, k6, Google Cloud Platform (GCP).

PROJECT

- Proactive Auto-Scaling Microservices Berbasis LSTM (2026)** | *Docker, Prometheus, HAProxy, Python, k6*
- Engineered a proactive auto-scaling framework leveraging Multivariate LSTM (Quantile Loss) time-series forecasting to dynamically maintain microservices SLA compliance.
 - Integrated real-time metric collection and load testing using Prometheus, HAProxy, and Grafana k6 to validate system scalability under peak traffic conditions.
- Aplikasi Web Psikotes (2025)** | *Laravel 11, Filament PHP, Redis, Google OAuth, reCAPTCHA*
- Developed a full-stack psychological testing platform built on Laravel 11 and Filament admin dashboard.
 - Implemented Google OAuth authentication and reCAPTCHA protection, utilizing Redis caching to optimize database query performance and response times.
- Smart Home IoT dengan AI (2024)** | *IoT, K-Means Clustering, Flutter, Android*
- Designed an IoT energy monitoring system using K-Means clustering algorithm to detect electrical waste patterns and power usage anomalies.
 - Built a cross-platform mobile application with Flutter for real-time device control and telemetry monitoring.
